

Saiganesh Sattenapalli

Data Analysis and AI Engineering

Hyderabad, India | +91 9346753626 | saiganeshsattenapalli26@gmail.com
github.com/saiganeshsattenapalli | [Portfolio source](#)

Profile

Second-year computer science student building the Curiora ecosystem of local AI applications and data workflows with Python and SQL. Project work spans multimodal model integration, transaction reporting, and classification prototypes. Seeking Data Analyst, ML Engineer, and AI Engineer opportunities.

Education

B.Tech in Computer Science (AIML) | 2025-2029 (expected)

Malla Reddy College of Engineering, Hyderabad

Technical Skills

Data and programming: Python, SQL, pandas, NumPy, PostgreSQL

Machine learning: scikit-learn, logistic regression, feature preparation

AI applications: MLX, PyTorch, Hugging Face Transformers, text and vision model integration

Application development: FastAPI, Git, Jinja2, JavaScript, HTML, CSS

Selected Projects

Curiora CampusOS [GitHub](#)

2026

Local AI application prototype | Python, FastAPI, MLX, PyTorch

- Built a unified text and image inference API integrating GPT-OSS-20B and Qwen3-VL-8B, with runtime selection for Apple Silicon MLX, CUDA, and CPU.
- Implemented model unloading before model switches, conversation IDs, image validation, temporary file cleanup, and inference dispatched to a thread pool.

Curiora Pay [GitHub](#)

2025-2026

Banking and data workflow prototype | Python, PostgreSQL, pandas, scikit-learn

- Implemented deposits, withdrawals, transfers, and transaction history; queried account transactions with SQL and exported statements through pandas to CSV.
- Integrated a logistic regression demonstration using balance and transaction count as features, trained on a small synthetic dataset for learning purposes.

Curiora Research [GitHub](#)

2026

Local visual intelligence experiment | Python, MLX, Qwen3-VL

- Implemented lazy loading and serialized inference for a local vision-language model, with prompts that require image-grounded answers and explicit uncertainty.
